## ON-SITE SERVER FOR PETROLEUM AND RETAIL OPERATIONS

Direct Connect provides reliable and accurate real time connection of on-site devices to the Petrosoft Cloud over the internet. It helps to achieve true automation of business processes and enables retailers to update prices in real time, offer intraday promotions, collect sales and inventory data instantaneously and automaticaly without errors or need for manual intervention. Direct Connect is integrated with all major POS and ATG providers and enables retailers to control their operations remotely through the web or mobile applications.

Petrosoft

IoT ENABLER FOR PETROLEUM AND RETAIL

The 4th generation of Direct Connect devices is designed to provide a platform for site-level applications utilizing the Linux operating system and an enterprise-level database.

Direct Connect is a bundled network of hardware and software solutions which provides a reliable, fast and secure way for retailers to automatically connect and transfer their video, audio, POS and automatic tank gauging (ATG) data to their back-office and analytics systems.

- I-SUPPORT DX10/HDCP, SUPPORT HDMI
- ONBOARD REALTEK RTL8111F: 10/100/1000 GIGABIT
- MSATA 32GB SSD
- INTEL ® BAY TRAIL J1900 PROCESSOR
- BASE FREQUENCY 688 MHz MAX FREQUENCY 854 MHz
- INTEL ® NM60 EXPRESS CHIP
- 2 GB RAM

KEY FEATURES:

- Plug-and-Play: no professional setup required
- Centralized Management and Configuration
- Continuons Monitoring and Remote Access
- Built-in Autonomic Capabilities: Offline processing capabilities that minimize latency and connection dependencies.
- Available in 82 countries - Agile Localization

ENTERPRISE-LEVEL BENEFITS:

- Real-Time Analytics
- Rapid Deployment
- Fast, Always-on Transactions Processing
- Continuous Availability and Scalability
