

FOODSERVICE SIMPLIFIED

Technology is changing how retail and downstream petroleum business is done. Convenience and foodservice retailers can rely on smarter ordering, preparation, and operations provided by Qwickserve, the foodservice automation solution by Petrosoft.

CONSUMER BENEFITS

Improvements in workflows can change the consumer's experience with easier ordering, consistent order preparation, and ingredient availability.

C-STORE AND FOODSERVICE OPERATOR BENEFITS

Improvements in workflows change not only a customer's perception of a store or restaurant but also the operator's profitability. Greater control over ingredient costs, margins, and labor costs all help to ensure a profitable bottom line. Remote access to these tools also provides the freedom to take care of your c-store or restaurant no matter where business takes you.

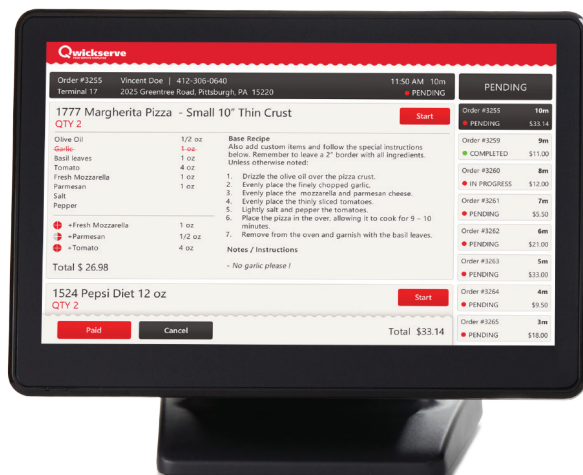

QWICKSERVE

Greater productivity, higher customer satisfaction, and better margins. It's all possible with Qwickserve. This foodservice automation and back-office solution includes self-service kiosks with a made-to-order app, kitchen display units and app for consistent order preparation, transaction and label printers, a foodservice back-office app, and integration with point-of-sale (POS) solutions.

KEY BENEFITS

- Increase sales with upsells (ease add-ons), promotions, and meal deals
- Increase off-premise sales with mobile ordering
- Provide faster service with greater accuracy and consistency with automated workflows
- Provide consumers with nutritional information
- Increase profits by tracking food costs at the ingredient-level
- Increase labor efficiency by automating repetitive and error-prone tasks
- Easily manage transactions with an integration with SmartPOS and other POS systems
- Increase brand loyalty by providing a completely branded experience

"Now it seems like consumers will go out of their way just to avoid talking to you. Some will avoid your pizzeria altogether if they find out that calling is the only way to order a pizza."

The 2018 Pizza Power Report, PMQ Magazine

QWICKSERVE + SMARTPOS 400

C-stores and restaurants who want to streamline in-store orders at the point-of-sale (POS) or take customized phone orders can take advantage of the embedded SmartPOS option. The Qwickserve embedded app for Petrosoft's SmartPOS 400 not only offers the convenience of the ordering app but also the many advantages of SmartPOS.

SmartPOS 400 is designed to meet c-store and foodservice environmental challenges. It meets the needs of limited-service restaurants such as quick-service, fast casual, and pizza restaurants. It includes a central unit with an all-in-one die-cast aluminum body, cashier touchscreen, POS hardware, POS app, and a customer display for transaction summaries and promotions. This cloud-connected POS system is also ideal for retailers who are concerned with reducing cashier mistakes, spoilage, and fraud.

As the demands of your business grow, SmartPOS 400 is designed to scale, accommodating integration with back-office, operational technology, and enterprise solutions.

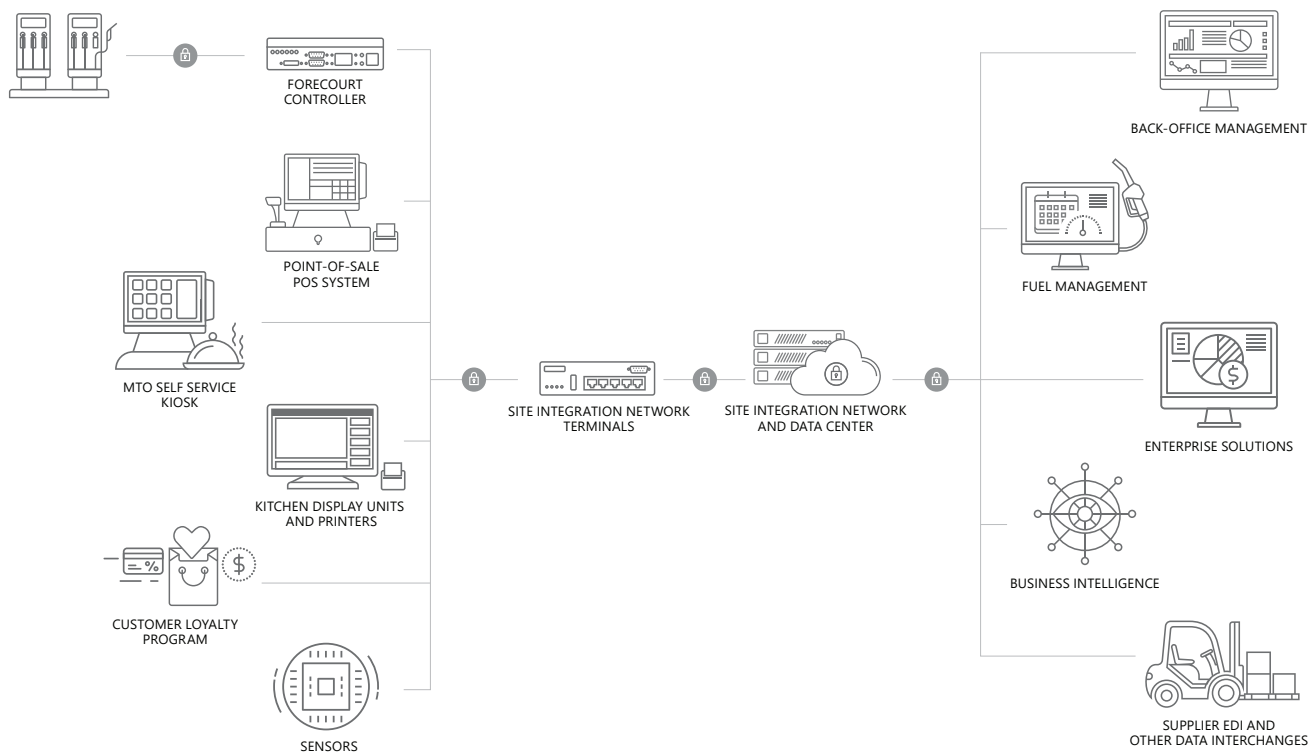

"Food sales have increased by 10-15% since we have installed Qwickserve."
Mandy Campbell, Kristyaks Korner

ABOUT PETROSOFT AND THE RETAIL ECOSYSTEM

Petrosoft's true-cloud platform and partnerships provide innovative business solutions for the retail and downstream petroleum industries. Beginning in 2002, Petrosoft transformed the convenience store industry when its founder, a retail operator and engineer, introduced C-Store Office, its cloud-based back-office app. Today, the company designs, develops, and markets end-to-end SME retail technology, enabling a seamless connection between manufacturers, suppliers, sites, back-office, and enterprise systems. The company continually strives to find innovative ways to enable retail operators to manage their forecourt, in-store, and back-office operations. The company supports its product line from its headquarters in Pittsburgh, PA. Find out more at www.petrosoftinc.com.
