# EagleEye

**The integration of the Eagle Eye Camera System with Petrosoft's LPA** (Loss Prevention Analytics) offers retailers a powerful and seamless surveillance solution to enhance security and streamline store operations. This innovative combination provides real-time video monitoring, advanced transaction tracking, and robust security tools, reducing the risk of fraud and theft while improving overall operational efficiency. With multi-angle coverage and automated alerts for suspicious activities, the Eagle Eye and LPA duo empowers retailers to optimize both front-end security and back-end management, making it ideal for single-store operators and large retail chains alike.

## Security Meets Efficiency

Streamline security with real-time monitoring and alerts, reducing theft and fraud risks while enhancing customer safety. Let your staff focus on delivering great service and maintaining a secure environment.

## Profit with Protection

Lower operational costs by automating surveillance tasks and reducing the need for additional security personnel, all while maintaining the highest level of service and safety.
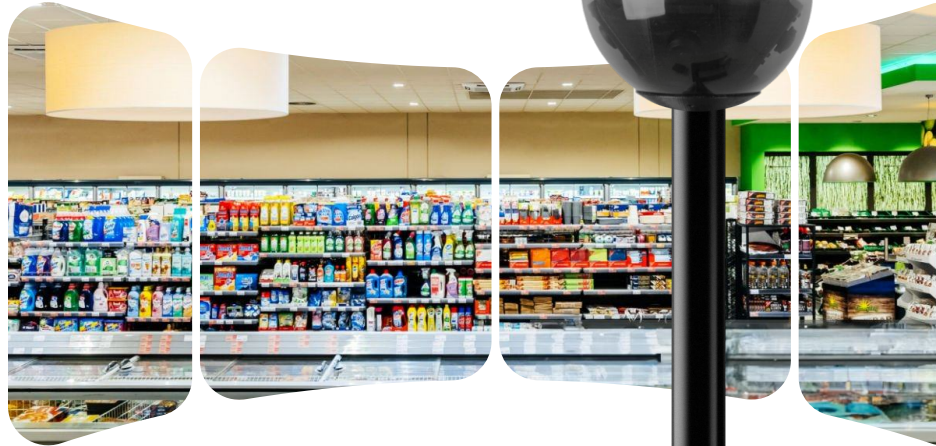

## Smarter Security and Compliance

Gain peace of mind with the Eagle Eye system's real-time monitoring, age verification tools, and automated risk event alerts, helping you stay compliant and protect your bottom line from potential threats.

# EagleEye

- **4 High resolution Cameras**
- **Powerful Clear Range Speaker**
- **Notification Light Beacon**
- **360° Ballistic Plastic Sphere**
- **Magnetic or Direct Mount Base**

The Eagle Eye Camera System offers advanced security, real-time transaction monitoring, and robust compliance management. It enhances operational efficiency by automating surveillance, tracking activities, and ensuring adherence to regulations, making it an invaluable solution for both small operators and large retail chains.

### Comprehensive Multi-Angle Surveillance
Eagle Eye eliminates blind spots by capturing all interactions from multiple angles, ensuring thorough coverage of your store.

### Automated Risk Event Alerts
Flags high-risk transactions such as voids, refunds, and other suspicious activities, linking them directly to video footage for quick review.

### Transaction Monitoring
Tracks and verifies all transactions with corresponding video footage to ensure accuracy and prevent fraudulent edits or basket manipulations.

### Age Verification Compliance
Seamlessly integrates video and transaction data to ensure proper age verification for restricted product sales, enhancing compliance and reducing risk.
